Data Migration as a Service (DMaaS)

Migrate your data swiftly, confidently and cost-effectively

SUMMARY

- Zero downtime, end-to-end block-level storage data migration
- Migrate to and from any storage array
- Reduce manual processes to meet narrow windows including automated provisioning and allocation features; ensuring deadlines are met

FEATURES

- Storage Vendor independent
- Transparent migration of LUNs – physical or virtual
- Migrate to fibre channel, iSCSI or cloud storage
- Automatic discovery of all hosts and LUNs
- Manages QoS with business needs in mind with no impact to production environment

VIADEX DMaaS IS IDEAL FOR:

- Businesses with legacy storage arrays that need to migrate data due to capacity, performance or security issues.
- Businesses who need a simple way to migrate data without incurring critical business downtime.

THE SOLUTION

Viadex Data Migration as a Service, powered by Cirrus Data Migration Server, is an end-to-end data service that maintains the highest level of availability and integrity of your data and reduces the complexity of organising and scheduling the migration project.
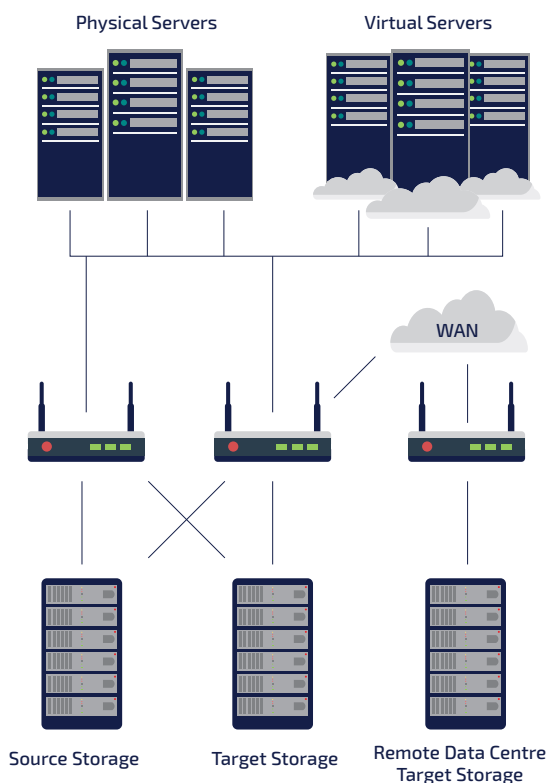

Viadex design, deploy, and optimise environments from a few terabytes up to petabytes with planning reduced from months to days and cutover from days to hours.

SEAMLESS INSTALLATION

Endorsed by major storage vendors around the world, this solution installs seamlessly into your existing environment. While working with each customer's individual requirements, data migration sessions can be defined and scheduled with various migration priorities and aggressiveness levels to ensure optimal traffic efficiency and productivity.

With the patented pMotion technology, the final cutover to new storage can be done with little to no downtime ensuring that our customers are able to access the data at all times and with the performance they expect. At the conclusion of the project, a secure erasure may be performed to ensure complete data wiping of the old storage for either reuse or return to the manufacturer.

Viadex and Cirrus data migration services provide the best in class service experience to reduce risk, planning time and Data Migration complexities, working across any vendor, physical or virtual.

Data Migration as a Service (DMaaS)

About Viadex

Experience: Viadex work with best-in-class global partners to deliver tried and tested approaches and engagement models, following a robust framework approach to ensure justifiable outcomes and reduce project risks.

Direction: In an increasingly competitive environment, a 'one size fits all' approach to IT rarely addresses your objectives: reducing risk, reducing costs or improving efficiencies.

Precision: Our structured methodology analyses your current mode of operation (CMO) to best define the scope of the IT solution, aligned to the needs of the business now and into the future.

Focus: Viadex provide tactical and strategic IT direction to help focus on your current and future business goals and long-term strategy.

Global Logistics

By partnering with our customers, we handle the process of manufacturer evaluation and selection, commercial negotiations and global support to make sure the technology solutions meet the necessary business requirements.

The Viadex Global Logistics Service helps you create an infrastructure that is agile enough to adapt and grow with you across the globe. The entire team work across all International time zones, no matter where you are based, offering a 24/7 emergency worldwide response.

Consulting and Professional Services

An agile infrastructure designed to service end-user experience is both critical and indispensable in today's world.

Viadex Consulting and Professional Services follow our core methodology of Audit, Design, Deploy and Optimise, to help transform your infrastructure to directly support your business productivity goals and enhance end-user experience.

Managed Services

Viadex has the global capability to provide a wide range of Managed Service solutions to help organisations with the operation of their technology environments.

Viadex provide 24x7x365 technical expertise, service consistency and flexibility across multiple vendors, technologies and geographies.

Every service is wrapped into our Global IT Service Desk, using IT Service Management and ITIL aligned frameworks, detailing set processes supported by highly skilled and trained people.
