# Infrastructure as a Service (IaaS)

## Powered by iland

**Viadex MSP specialise in supporting mid-market organisations to grow globally, at speed, safely.**

## Free up your people to focus on better business outcomes. Scale globally, on-demand.

Mid-market organisations want to benefit from cloud-based infrastructure to free their IT teams up from managing & supporting hardware and operating system platforms so they can focus on better outcomes for the business.*

What if your IT team didn't have to "keep the lights on"? What if your IT team spent less time supporting and managing hardware and more time focussed on the business to deliver improvement? What if deploying & supporting IT infrastructure was no longer something that took significant time and effort for your people?

The first pillar of Digital Transformation is Agile, Scalable, Secure infrastructure.

*See Viadex IDC research

Viadex deliver a complete service that is secure by design and run from 10 global data centre locations which ensures data sovereignty for compliance and governance, a service closer to the user for best performance and leverages the best of cloud commercial models.

Across the mid-market, organisations are seeing the benefits of moving IT investment away from traditional capex models to opex based consumption models so they can reinvest in their people.

Viadex support this transformation in our client's business by delivering fully managed infrastructure that grows securely, globally, on-demand.

## Benefit from the cloud with expert arms around it.

### Why IaaS is a fit for your organisation:

- IaaS frees IT teams up from managing and supporting infrastructure
- On-demand consumption models move IT investment away from large capex refresh
- Global IaaS grows with your business, deployed on-demand so you can get to market quickly
- All inclusive support
- Advanced security and compliance
- Resilient-by-design for always-on availability
- 10 Global data centre locations for performance, security and compliance
- Improve operational efficiency
- Remove need for traditional IT infrastructure refresh

### Expert management & support

- Viadex manage your compute and storage resources & configure your network

- Proactive monitoring
- Report performance, billing, security and compliance information
- Manage performance, backups and recovery of VMs
- Manage disaster recovery
- Set customised alerts to receive notifications on security events

### Viadex IaaS includes the following standard features:

- iland Secure Cloud: Scalable enterprise-class Infrastructure-as-a-Service, stringent security and compliance needs
- iland LabEngine: Secure labs that allow customers to rapidly deploy and scale hands-on virtual environments for training, demos, beta testing and proofs of concept
- iland Secure Object Storage: Cost-effective, S3 API-compatible cloud storage for long-term retention of business- and mission-critical data.
- Built in backups ranging from a standard 7 days to longer-term retention policies
- Windows OS licensing at no additional cost
- Integrated VMware NSX firewall
