

Microsoft Office 365 Design and Implementation Service

Enhance workplace productivity

SUMMARY

- The essential toolkit for today's digital workplace, Office 365 replaces standard Office with a feature-packed seamless experience for administrators and users in the office or out on the business front line
- Consumption-based model, configured standalone or as part of a hybrid environment, supports agile working across all teams, no matter where they may be located, reducing operational costs
- Takes your workplace productivity and collaboration experience to the next level; more unified, more informed, and more equipped to deliver on customer expectations

FEATURES

- Simple and transparent cutover from your locally installed Office, providing a fully installed experience across all devices with up to 5 installs on your PC/Macs, Tablets and Phones per user
- Email mailbox up to 50GB per mailbox and attachments up to 150MB; File storage with OneDrive up to 1TB per user
- Instant Messaging and Collaboration with Skype for Business, Teams and Groups
- Archiving and legal hold capabilities plus unlimited storage for archiving and compliance
- Data Loss Prevention policies for retention of key communications and attachments.

THE VIADEX OFFICE 365 DESIGN & IMPLEMENTATION SERVICE IS IDEAL FOR:

- Organisations looking to reduce the time and costs involved when running their own application servers for email and business apps
- Driving an enhanced workplace productivity experience across email, collaboration, file storage, communication and many more features
- Organisations on their digital transformation journey, with a changing role of IT to deliver value and reduce non-value-add activities.

Viadex audit your workspace technologies, then design, deploy and optimise the Office 365 configuration that best suits your users' needs, making migration to the updated version easier, faster, and right first time.

We also help you understand a more streamlined approach to information management to make smarter business decisions faster and to accelerate productivity across connected teams.

THE SOLUTION

THE COMPLETE CLOUD DELIVERED, CONTINUALLY UPDATED PRODUCTIVITY AND COLLABORATION EXPERIENCE

Viadex provide rapid installation by skilled engineers ensuring minimal disruption. They'll audit your current systems, your usage of Microsoft Office and any other relevant business applications to ensure that the new version is configured in the right way for you to become fully operational from Day One.

The risk-free way to upgrade or migrate to Microsoft Office 365 and gain optimal revitalisation for your business and communication processes.

The Viadex Microsoft Office 365 design and implementation service gives you a bridge to the future of collaboration and productivity. We'll help you transform how you do business across your corporate network, at all levels of the organisation.

Microsoft Office Enterprise E3 suite includes the following familiar tools:

CHANGE YOUR WORLD WITH VIADEX

Host online meetings, web conferences and team sessions using Teams, Groups and Skype for Business. Broadcast Skype for Business meetings on the Internet or Intranet for up to 10,000 people who can attend in a browser on any device.

SharePoint Intranet and Team sites allow you to update or uplift your corporate intranet experience including document storage, sharing and collaboration – combined with OneDrive for Business to share and collaborate with massive amounts of storage.

Deliver more, share more, win more. Viadex can show you how, with Microsoft Office 365.

About Viadex

Experience: Viadex work with best-in-class global partners to deliver tried and tested approaches and engagement models, following a robust framework approach to ensure justifiable outcomes and reduce project risks.

Direction: In an increasingly competitive environment, a 'one size fits all' approach to IT rarely addresses your objectives: reducing risk, reducing costs and improving efficiencies.

Precision: Our structured methodology analyses your current mode of operation (CMO) to best define the scope of the IT solution, aligned to the needs of the business now and into the future.

Focus: Viadex provide tactical and strategic IT direction to help focus on your current and future business goals and long-term strategy.

Global Logistics

By partnering with our customers, we handle the process of manufacturer evaluation and selection, commercial negotiations and global support to make sure the technology solutions meet the necessary business requirements.

The Viadex Global Logistics Service helps you create an infrastructure that is agile enough to adapt and grow with you across the globe. The entire team work across all International time zones, no matter where you are based, offering a 24/7 emergency worldwide response.

Consulting and Professional Services

An agile infrastructure designed to service end-user experience is both critical and indispensable in today's world.

Viadex Consulting and Professional Services follow our core methodology of Audit, Design, Deploy and Optimise, to help transform your infrastructure to directly support your business productivity goals and enhance end-user experience.

Managed Services

Viadex has the global capability to provide a wide range of Managed Service solutions to help organisations with the operation of their technology environments.

Viadex provide 24x7x365 technical expertise, service consistency and flexibility across multiple vendors, technologies and geographies.

Every service is wrapped into our Global IT Service Desk, using IT Service Management and ITIL aligned frameworks, detailing set processes supported by highly skilled and trained people.
